

after years of listening to am radio and all it's repeat songs and commercials you came up with FM and it was good. A lot of music and hardly any crap. Now we have hardly any music, hardly any news and very little weather. We do however have a lot of talking about nothing all morning long with contests, phone ins, and other assorted crap. Now comes XM and other satellite radios and you want to but in and ruin that for us too. BUTT OUT!!! There are still plenty of people that actually enjoy the bull-crap AM and FM put out. It's time to share and not be so darn greedy!!!!
